

# Think Pig Links

Enduro offers a unique concept in pipeline pigging. Both flexible and versatile, the Enduro Pig Link concept allows many varied configurations and adaptations of cups, discs, and body links.

Most any design you may conceive, can be built with Pig Links.

The flexibility of the polyurethane body link allows the pig to pass bend radius as small as one diameter even when attached to additional link sections for added length and design variations. Enduro Pig Links are excellent for:

- Nitrogen Purges
- Line Cleaning and Scraping
- Batching
- Hydrostatic Fill and Displacement

Enduro - The Thinking Man's Pig
